

DEVENDRA VADLURI

Contact:91-9700804433

Email: devendra110591vadhuri@gmail.com

OBJECTIVE

Aimed to pursue a challenging role in dynamic concern & achieve perfection through performance.

PROFESSIONAL SUMMARY

- 5+ years of experience in Software development using Java and J2ee technologies.
 - Experience in using Spring(IOC, DAO, ORM, MVC) frameworks, Spring Boot, Spring Micro Services Object Oriented Programming concepts.
 - Hands on experience of using Object Relational mapping Tool Hibernate.
 - Experience of using SOAP Web services and Restful Web services.
 - Experience in involving the **Software Development Life Cycle (SDLC)** including Design, Development, Documentation, Testing, Deployment, Version Control and production support.
 - Ability to learn and adapt quickly to the emerging new technologies.
-

PROFESSIONAL EXPERIENCE

- Worked in **Vitech Systems Asia Pvt Ltd**, Bangalore as a Developer from Jun 2020 to Jan 2021.
 - Worked in **Infosys**, Bangalore as a Technology Analyst from Aug 2017 to May 2020
 - Worked in **Cognizant**, Bangalore as a Program Analyst from May 2016 to Aug 2017.
 - Worked in **CMPS Private Ltd**, Chennai as a Software Engineer from September 2015 to May 2016.
-

TECHNICAL SKILLS:

- | | |
|---------------------------|---|
| • Languages | : Java |
| • Skills | : Spring, Hibernate, Web Services, Micro Services, SpringBoot |
| • Application/Web servers | : Apache Tomcat, WebLogic |
| • RDBMS | : SQL, MySQL |
| • Operating System | : Windows, IOS |
| • IDE | : Eclipse, STS |
| • Build Tool | : Maven |

PROJECTS

Project 1

Project : V3
Application Name : V3
Duration : JUL 2020 – DEC 2020
Role : Developer.
Technologies : Spring, Restful Web services, Tapestry, GWT, Hibernate.

Description:

- V3 is a product which is an insurance based domain. The base product is built by the V3 team and top of it clients can modify any functionality as per requirement.

- This product gives feature such as enrolling a member to a insurance policy, coverages under that policy
- The technologies used in here are GWT, Tapestry, hibernate, PL/SQL.

Responsibilities:

- I was part of the enrollment module involved in design and development of UI fields and its corresponding service calls.
- As a developer , I have implemented the java classes which will get the UI value and process it to DB with their unit test cases.

Project 2

Project : Concierge
Application Name : Location Service
Duration : JUN 2018– MAY 2020
Role : Developer.
Technologies : Spring, Restful Web services, Couchbase, Micro Services

Description:

- Concierge is Apple's internal name for famous Genius Bar designed on micro service based architecture used across retail stores.
- Location service is one of the 20+ micro services part of Concierge system.
- It is mainly developed to achieve active-active system with Zero down time .
- Designed using technologies like Java, Spring 4, Maven, CouchBase.

Responsibilities:

- I was part of the core team involved in design and development of this micro service/
- As a developer , I have implemented the REST based API's along with their unit test cases.
- I have used Builder design pattern for object creation.
- Post development , I was actively involved in fixing QA/UAT defects.

Project 3

Project : Concierge
Application Name : MetaData Service, Functional Configuration Service
Duration : DEC 2017– MAY 2018
Role : Developer, Maintenance.
Technologies : Spring, Restful Web services, Couchbase, Microservices

Description:

- Metadata and functional configuration services are part of core micro services of Concierge.
- Metadata service deals with handling of metadata of Concierge which involves performing CRUD operations on metadata and exposing REST based API's to external systems/micro services.
- Functional configuration service deals with maintaining the system and application configurations required by various services of concierge.

Responsibilities:

- I have worked on developing REST based API's to expose metadata of concierge.
- Developed DAO layer to perform crud operations.
- Added a cache layer which will improve performance by reducing number of DB calls.
- Developed Couchbase views to retrieve the metadata and functional configs from DB.

Project 4

Project : KEYBANK
Application Name : IBX – Online Banking
Duration : July 2016 to July 2017
Role : Developer, Maintenance.
Technologies : JDK1.7, MySql, Soap webservice and Websphere

Description:

- I worked for a client called “KeyBank”, which is one of the largest banks in US .
- KeyBank has multiple applications and as a part of Cognizant support major application like Internet Banking (termed as IBX). In that Majorly
- TXT and ALT applications part of Internet Banking application which are used for text alerts system.

Responsibilities:

- Tracking each and every task on regular basis, Defect measurement, Defect tracking, Issue tracking.
- Fixing the bug in code. Code analysis.
- Maintaining necessary documents and deliverables.
- Working with the onsite-offshore team to minimize the defects, usually debug the defects by using Splunk and Dynatrace tools.
- Receiving urgent production fixes or changes from Client Front and providing solution on regular basis.

Project 5

Project :Axis, India
Application Name : Axis Burgundy
Duration : Sept-2015 to May-2016
Role : Developer
Technologies : JDK1.7, Ibatis, Oracle 10g

Description:

- Axis Burgundy is a mobile banking application extension to Axis Retail mobile app, especially for high risk profile customers having higher balance in their accounts.
- Features like fund transfer, bill-payment, mobile-top up along with mutual fund-investment option through which user can purchase funds, switching funds from one to other. The user can also redeem their profits at any time to their personal accounts.
- Based on the customer balance, the app will redirect to either Retail or Axis Burgundy. This application having separate burgundy theme, developed using MOBIEX tool as a middleware for Andriod, Iphone OSs.

Responsibilities:

- Involved in the designing of screens using Mobiex tool as a middleware.
 - Involved in writing Filter classes using Mobiex API.
 - Involved in writing Dao classes using Ibatisorm tool.
 - Involved in writing stub creation and calling Web service API.
 - Involved in fixing the issues reported by QA and Client.
-

EDUCATIONAL QUALIFICATION

- ❑ Bachelor of Technology in Electronics & Communication Engineering from Siddarth Institute of Engineering and Technology in 2013 with 71%
 - ❑ Intermediate: In 2009 from Sri Chaitanya Junior College, Tirupathi, State Board with 90%
 - ❑ Matriculation: In 2007 from, Sri VignanaJyothi High School, State Board with 86%
-

PERSONAL DETAILS

Name : DevendraVadluri
Father Name : Mr. Sreenivasulu
Date of Birth : May 11th, 1991.
Address : #199, 2nd cross, 9th main BTM 2nd Stage, Bangalore – 560076, Karnataka.

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
